ZEUS
ELECTROSTATIC SYSTEM

MANUAL GUN JGUN01 MD

- Gun made of high resistance polymer and high insulation
- Excellent balance
- Low weight
- Suitable for both retouching and large productions

- It can be supplied both in the version with and without rear keyboard
- Rear keyboard for adjusting the spraying parameters

THE GUN CAN BE EQUIPPED WITH THE WHOLE RANGE OF ZEUS ACCESSORIES

- Polyurethane powder tube
- High resistance suitable when color changes are not required
- Powder tube for color changes
- Present in different diameters
- Suitable for color change
- Insert in conductive material for grounding the pipe
- Fan and diffuser nozzles of different sizes suitable for any type of application
- Nozzle extension in different sizes suitable for reaching the most hidden recesses
- Corona Collector device reduces the orange peel effect on painted items
- Fluidized cup to make any type of sampling

Manual Unit

JDIGITAL-C manual painting unit

- This equipment allows you to work directly from the powder box, suitable for color change
- The high efficiency of the JGUN01 MD gun in combination with the JGEN command module guarantees excellent performance and a high-quality finish
- The right tool to meet the productivity needs of painters
- Double positioning vibrating table of the box you can turn the box in any position to collect all the dust
- Vibrating table with energy saving system
- Blocking of the suction device in the raised position
- Venturi pump cleaning system (optional)
- Color change in seconds

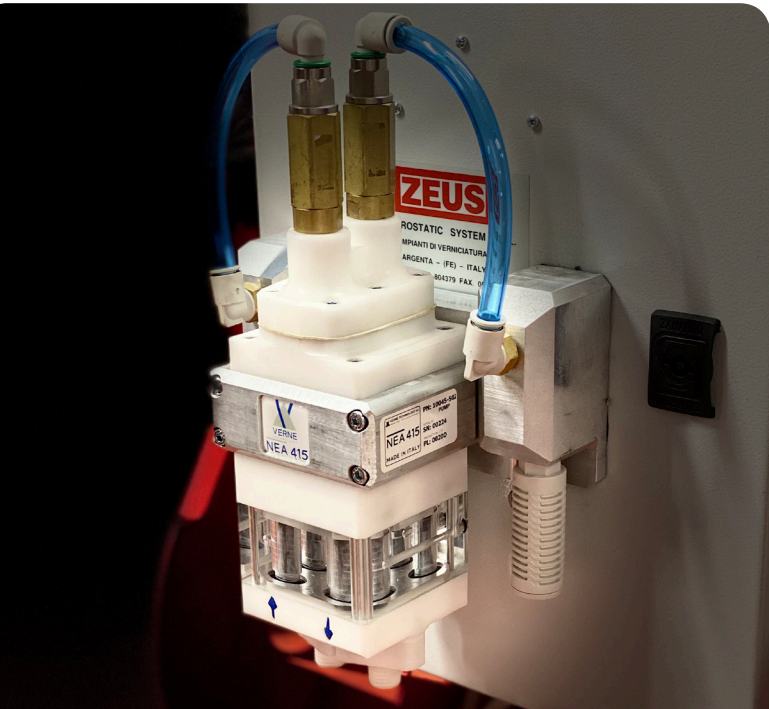

DENSE PHASE JDIGITAL - HC Manual painting unit

- The dense phase technology allows the transport of painting powder with low quantities of air.
- The dense phase technology allows the transport of painting powder with low quantities of air.
- The J series dense phase equipment allows a quick return on investment.
- INCLUDED

INCLUDED IN THE DENSE-PHASE SYSTEM "JDIGITAL - HC:

- Nr. 1 JGen-DPLP control unit;
- Nr. 1 JGun-DPLP (Manual gun with powder hose with internal diameter of 6mm.);
- Nr. 1 NEA 415 dense phase pump;
- Nr. 1 Cardboard powder suction system.

Manual Unit

JDIGITAL-T manual painting unit

- Manual painting equipment equipped* with fluidized tank
- The powder container is suitable whenever it is necessary to use powders that require high fluidization or for very large production batches
- The high efficiency of the JGUN01 MD gun in combination with the JGEN command module guarantees excellent performance and a high-quality finish
- The right tool to meet the productivity needs of painters.

DIGITAL-B manual painting unit

- Manual painting equipment for sampling and laboratory tests
- Equipped with shockproof trolley
- Bottom compartment for accessories
- Upper connection panel
- Fluidized bowl with integrated Venturi pump

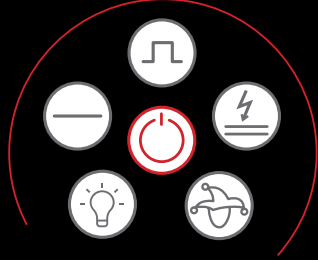

Control unit

CONTROL UNIT JGEN 01

Control Unit for All Zeus' Guns

- 50 storable programs
- Thanks to the innovative J-Flow-Control system, powder delivery is always under control
- Navigation system for setting parameters
- Constant powder flow in any situation
- The JGEN control units use the J-Flow module which keeps the air flow to the Venturi Pump constant.
